support.

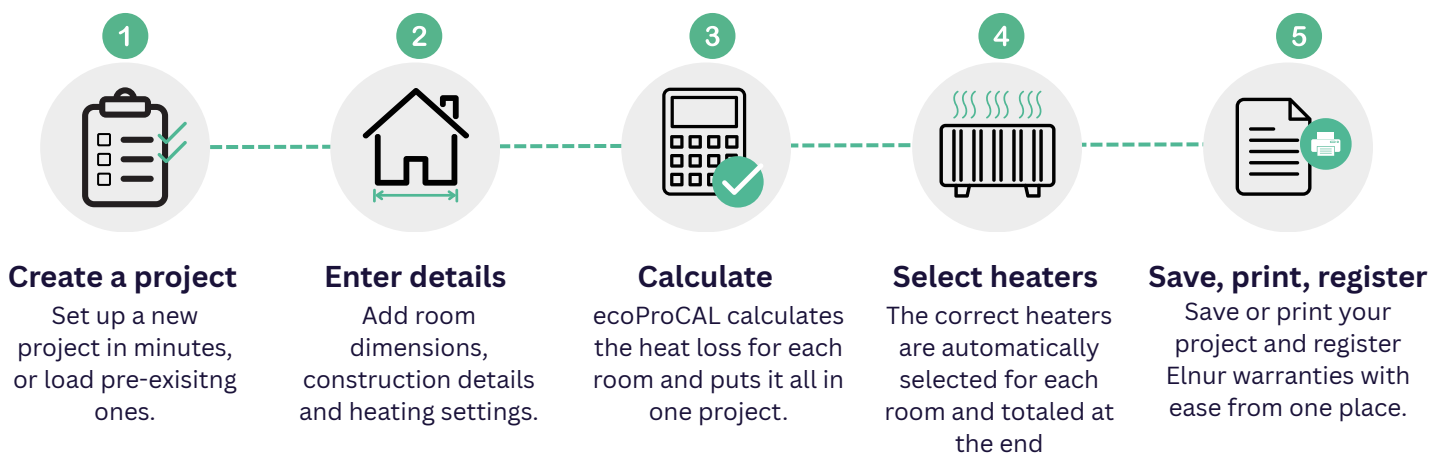

What is **ecoProCAL**®?

ecoProCAL is Elnur's free*, online project tool designed for heating installers.

It calculates room-by-room heat losses, automatically selects the right Elnur heater for each space and helps you manage projects and warranties - all in one place.

How it works

Key features

Room-by-room heat loss calculations

Accurate heat loss calculations.

Elnur warranty registration

Register and reprint warranties quickly.

Manage your projects

Save, load, edit, and print projects.

Automatic heater selection

The right heater, matched to calculated heating requirements.

Built for all installers

From individuals to larger companies, ecoProCAL grows with you.

Installer Support

Access help, training, and resources you need.

ecoProCAL has transformed the way we work; faster projects, accurate results and full confidence in every installation.

Designed by installers, for installers.
